

ORACLE

Move to NEW 'smart' procurement

Unlock the benefits of Oracle Responsive Self Service Procurement with KPMG

Keep up with the latest procurement technology trends by transitioning to Oracle Responsive Self Service Procurement. KPMG has developed ways to simplify this transition, ensuring compliance with Oracle's mandate to shift from desktop to mobile-based applications by Q1 2025.

The new Responsive Self Service Procurement (RSSP) application, a key component of Oracle Fusion Cloud, expands functionality to include smartphones, tablets, and laptops. Its interface adjusts to various screen sizes and provides a consistent, consumer-grade experience for users on the go as well as those working on desktop computers.

Built on Oracle's Redwood design system, the RSSP components and technology stack feature a friendly, modern design, powerful and intelligent search capability, and enhanced master item integration. Redwood technology also allows clients to create their own custom forms to extend application usage.

RSSP benefits include:

- The same look and feel for a more user-friendly experience across all devices
- Improved search capabilities, user interface, and employee requisitioning capabilities
- Ability to accommodate incremental updates sooner.

Staying ahead of the curve with KPMG

Oracle releases new functionality every quarter, so organizations should balance their requirements against the release schedule. While customers can move to RSSP themselves during their quarterly patching process, those with complex configurations can find it more valuable and efficient to work with KPMG. As an Oracle alliance partner for over 30 years, we can help ensure that systems are upgraded before the 2025 deadline.

Our four-phase application onboarding process includes:

- A one-week, no-cost assessment to define the service scope, including core configurations, users and transaction volume, business processes, security, and degree of customization and extensions.
- Implementation and testing of all unique scenarios to help ensure that no process is missed during the transition period.
- Training to ramp up skills on the new user interface and equip people to work in new ways.
- Deployment that helps ensure end users are empowered to sustain the change.

Assessment	Implement & Test	Train	Deploy and Evolve
<p>What is Changing and must be addressed</p> <p>Get a baseline of the current state and see how it layers into the future of RSSP</p> 	<p>Configure and Smoke Test RSSP</p> <p>Test all unique scenarios to ensure that no process is missed during the transitional period</p> 	<p>Ramp up skills on new UI</p> <p>Move the organization towards the end state and equip people to work in new ways</p> 	<p>Make it Happen and Sustain</p> <p>Ensure end users are empowered and ready for to take on the change</p> 

As the schedule below shows, RSSP uptake requires anywhere from five to 13 weeks to complete, depending on the number of users and customizations and system complexity.

RSSP implementation schedule

Complexity	Timeline
Low	5-6 weeks
Medium	8-9 weeks
High	12-13 weeks

Achieving success with KPMG and Oracle

As an award-winning Oracle partner, KPMG knows how to deliver successful transformation programs. We balance business expertise, industry focus, and advanced technology to accelerate innovation and time to value.

Working together, KPMG and Oracle can accelerate the transition of your mission-critical procurement systems. Connect with one of our team members to learn more.

KPMG. Make the Difference.

KPMG has been an award-winning Oracle alliance partner for over 30 years.

Our delivery teams have experience across all Oracle products and modules (ERP, EPM, SCM, HCM, CX, Analytics, OIC, Industry Solutions), including developing unique PaaS solutions and deep experience implementing Oracle Accounting Hub and Subscription Management modules.

Embarking on a cloud transformation journey with KPMG and our alliance partner, Oracle, delivers value, drives sustainable change, and accelerates innovation—across the front, middle, and back offices.

If you have any questions on how to accelerate digital transformation or to find out more.
