Only future-ready banks will thrive

KPMG Powered Enterprise enabled by Oracle for Financial Services – Banking

Banks need to fast track digital integration throughout their organization. And the need for speed is more important than ever before, as a new banking landscape unfolds, bringing with it a continuous wave of new competitors. The big and strong are no longer guaranteed to win. Speed and agility count just as much...if not more. And the time to accelerate is now.

KPMG: Delivering meaningful transformations

Customer demands, rapid enhancement in digital capabilities, new sources of competition, and trust objectives are forcing banks to urgently innovate.

Future banks will be reimagined as commercial digital banks, providing an evolving mix of business products and services, and integrating vertically and horizontally across the value chain.

KPMG Powered Enterprise for Banking supports rapid business modernization aimed at driving better functional performance, supporting new ways of working, and ensuring processes are future-ready and better at controlling risk and regulation.

Through leading practices and processes on preconfigured market-leading Oracle Cloud ERP, EPM, and Embedded Finance technologies, KPMG Powered Enterprise for Banking can help organizations rise to the challenges ahead, such as:

- Designing, implementing, and managing platform digitalization, mobile-first, customer-centric operating models to enable real-time insights
- Transforming to modern cloud financial architectures and processes that reduce manual intervention and enables emerging technologies
- Creating new treasury management solutions by leveraging commercial banking APIs to power Embedded Finance solutions
- Establishing a governance structure and process for vetting and implementing cloud updates and future process changes
- Implementing scalable finance and accounting platform to enable growth
- Driving automation and efficiency to reduce customization and decreased time to close

100 senior banking executives were surveyed:

investing heavily to develop digital and fintech capabilities

50%

back-office processes are mostly or fully digitized

25%

front and back-office processes are not at all or barely digitized
