

Ideas and Insights

Ideas and Insights brings you our best thinking on the issues affecting your business now. It's valuable information in a format you can use.

Hot topics

Filling the "green data" gap with AI

Financial services can now use AIs to fill the gap in "green" data when assessing transactions. See how they're turning this technology into an ESG differentiator with the help of new analytics practices.

How to win in the age of complex M&A deals

Deals today are aimed at ambitious strategic goals—transforming operating models or acquiring digital capabilities, for example. Success requires a relentless focus on strategic value, synergies, and preventing value leakage

Building a better customer experience

Investment management organizations today are using customer-centric technology to enable superior service delivery. Firms not embracing digital transformation are rapidly falling behind

User-defined applications (UDAs): More risk than reward?

User-defined applications (UDAs) may be convenient, but they create complexity, errors, and risk. KPMG leverages cloud-based, low-/no-code platforms such as Unqork to eliminate UDAs and improve workflows.

Tax news

We'll help you get ready for BEPS 2.0

BEPS proposals may bring challenges to your organization. Now, the proprietary KPMG BEPS 2.0 model, built on the KPMG Digital Gateway, lets you assess—and begin preparing for—those challenges in as little as one hour.

Regulatory news

How to read the whirlwind past three months

With second quarter 2022 behind us, we reflect on the continued frenetic pace of 2022 financial services' regulatory activity.
