IN THIS ISSUE: THE VIEW AHEAD; INDUSTRIAL PRODUCTION UP; GENAI AND HEALTHCARE; TAX DEPARTMENT DISRUPTIONS

We're not in Kansas anymore...The view from Washington

After a series of meetings with global leaders in D.C., KPMG Chief Economist Diane Swonk lays out the reasons for economic optimism and the reasons for political concern in her perceptive and bracing analysis of the real-life implications of macro forces. [We're not in Kansas anymore...The view from Washington \(kpmg.com\)](#)

Industrial production rises

February industrial production rose 0.1, with bounce-backs in industries associated with the housing sector. At the same time, manufacturing output surged 0.8%, the largest increase in about a year. Which sectors gained? Which ones declined? [Industrial production expanded \(kpmg.com\)](#)

GenAI is poised to transform healthcare. Is healthcare ready?

The stakes have never been higher. GenAI is ready to open floodgates of untapped opportunity and transform the healthcare industry into a dynamic engine of growth. [GenAI is poised to transform healthcare. Is healthcare ready? \(kpmg.com\)](#)

How are tax functions responding to disruptions?

KPMG launched the Global Tax Function Benchmarking Survey to learn how tax departments across industries and continents are adapting to an environment of continuous disruption. See how what they're thinking—and the actions they're taking. [No stranger to change \(kpmg.com\)](#)
